

Jacob C. Kimmel

San Francisco, California – jck.bio

jacob@jck.bio
(321)-536-1919

EDUCATION

- **Ph.D. – University of California, San Francisco** San Francisco, CA
Dept. of Biochemistry & Biophysics; Fellowships: NSF GRFP, PhRMA, NIH T32, Discovery Sept. 2015 – Apr. 2018
- **B.S. (Honors) - University of Central Florida** Orlando, FL
Biotechnology; GPA: 4.0/4.0; National Merit Scholar: Full Tuition & Stipend Funding Aug. 2012 – Apr. 2015

RECENT EXPERIENCE

Calico Life Sciences South San Francisco, CA
Computational Fellow March 2020 - Present

- Leading a research program focused on programming cell identity to address age-related diseases
- Lead the development of a computational & experimental platform for pooled screening of cell reprogramming strategies, successfully completing a company-wide goal
- Developed scNym semi-supervised adversarial neural networks for classifying single cell genomics profiles. Set new state of the art for performance – scnym.research.calicolabs.com
- Guided biomarker and lead selection decisions for small molecule/mAb programs with functional genomics

Calico Life Sciences South San Francisco, CA
Data Scientist I & II, Computing May 2018 - February 2020

- Lead an investigation of cell type and tissue environment influences on aging using single cell genomics across three murine tissues – mca.research.calicolabs.com
- Lead an investigation of skeletal muscle aging using single cell genomics & dynamical systems modeling that revealed a critical point where old stem cells fail to differentiate – myo.research.calicolabs.com
- Developed an analysis platform for pooled genomics screens, guided target ID & biomarker development
- Developed timelapse image analysis methods for oncology applications, enabling multi-day cell tracking

University of California, San Francisco San Francisco, CA
PhD Candidate; Thesis: Inferring cell state from cell behavior; Advisor: Wallace Marshall Sept. 2015 - Apr. 2018

- Developed Heteromotility, a biological motion analysis package to quantify cell state transitions
- Developed Lanternfish deep learning package to enable discrimination and prediction of cell behaviors
- Discovered age-dampened state transitions in myogenesis with single cell RNA-seq & Heteromotility

IBM Research San Jose, CA
Deep Learning Intern, Cellular Engineering Sept. 2017 - Dec. 2017

- Developed rapid convolutional neural network segmentation methods for microscopy data
- Implemented a Natural Evolution Strategies (NES) optimization framework to improve multi-cell tracking

SKILLS

- **Data Analysis:** Experimental design, linear modeling, time series analysis, multivariate statistics
- **Machine Learning:** Neural networks, semi-supervised learning, adversarial learning, PyTorch, Tensorflow
- **Programming:** Python (scipy, scikit-learn, statsmodels), R, Matlab, git, bash, L^AT_EX
- **NGS:** Single cell and bulk RNA-seq analysis, variant calling, samtools, IGV
- **Image Analysis:** Image segmentation, classification, particle tracking
- **Experimental Biology:** Single cell RNA-seq, primary cell culture, molecular biology, automated microscopy

SELECTED PUBLICATIONS

1. **Kimmel JC[†]**, Kelley DR[†]. Semi-supervised adversarial neural networks for single-cell classification. 2021. *Genome Research*. doi: 10.1101/gr.268581.120.

2. **Kimmel JC**[†], Yi N, Roy M, Hendrickson DG, Kelley DR[†]. Differentiation reveals latent features of aging and an energy barrier in murine myogenesis. 2021. *Cell Reports*. doi: 10.1016/j.celrep.2021.109046.
3. **Kimmel JC**, Hwang AB, Scaramozza A, Marshall WF, Brack AS. Aging induces aberrant state transition kinetics in murine muscle stem cells. 2020. *Development*. doi: 10.1242/dev.183855. **Chosen as a Research Highlight** by *Development*: Muscling in on Stem Cell Aging.
4. **Kimmel JC**[†]. Disentangling latent representations of single cell RNA-seq experiments. 2020. *bioRxiv*. doi: 10.1101/2020.03.04.972166.
5. **Kimmel JC**, Penland L, Rubinstein ND, Hendrickson DG, Kelley DR, Rosenthal AZ. Murine single-cell RNA-seq reveals cell-identity- and tissue-specific trajectories of aging. 2019. *Genome Research*. doi: 10.1101/gr.253880.119. **Featured on the cover of *Genome Research***.
6. **Kimmel JC**, Brack AS, Marshall WF. Deep convolutional and recurrent neural networks for cell motility discrimination and prediction. 2019. *IEEE Transactions on Computational Biology and Bioinformatics*. doi: 10.1109/TCBB.2019.2919307. Preprint featured in *Company of Biologists: the Node*.
7. **Kimmel JC**, Chang AY, Brack AS, Marshall WF. Inferring cell state by quantitative motility analysis reveals a dynamic state system and broken detailed balance. 2018. *PLoS Computational Biology* 14(1): e1005927. doi: 10.1371/journal.pcbi.1005927. **Chosen as an Editor's Pick** in *PLoS Editor's Collections*.

SELECTED PRESENTATIONS

1. **Kimmel JC**, Kelley DR. scNym: Semi-supervised adversarial neural networks for single cell classification. Contributed talk at the International Conference on Machine Learning (ICML) 2020, Workshop on Computational Biology. Awarded: Contributor Award for best reviewed papers.
2. **Kimmel JC**, Hendrickson DG, Kelley DR. Differentiation reveals latent features of aging and an energy barrier in murine myogenesis. Selected talk at Cold Spring Harbor Mechanisms of Aging 2020.
3. **Kimmel JC**, Kelley DR. scNym: Semi-supervised adversarial neural networks for single cell classification. Selected talk at Intelligent Systems for Molecular Biology (ISMB) 2020, Machine Learning in Computational & Systems Biology session.
4. **Kimmel JC**, Penland L, Rubinstein ND, Hendrickson DG, Kelley DR, Rosenthal AZ. Cell type and tissue-specific aging trajectories. Invited talk at California QB3 Institute's *Aging and the Single Cell* event. San Francisco, CA. 2019.
5. **Kimmel JC**, Penland L, Rubinstein ND, Hendrickson DG, Kelley DR, Rosenthal AZ. Cell type and tissue-specific aging trajectories. Invited talk at Mission Bay Capital Biolabs. San Francisco, CA. 2019.
6. **Kimmel JC**, Hwang A, Brack AS, Marshall WF. Inferring cell state dynamics with machine learning. Invited talk at the *Machine Learning in Cell Biology* session at ASCB-EMBO. San Diego, CA. 2018.
7. **Kimmel JC**, Brack AS, Marshall WF. Deep neural networks for cell motility analysis. Nvidia Deep Learning in Biomedicine Workshop. San Francisco, CA. 2018. Awarded: Nvidia Most Innovative.

SCIENTIFIC SERVICE

- **Mentorship**: Industry mentor for Stanford CS273B Deep Learning in Biomedicine (2019)
- **Peer Reviewer**: *Bioinformatics*, *eLife*, *Genome Research*, *IEEE Biomedical & Health Informatics*, *Nature Medicine*, *PLoS Computational Biology*, *Proc. of the National Academy of Sciences*
- **Open Source**: statsmodels, CellBender, scnym[†], heteromotility[†], velodyn[†]. [†]Maintainer.

SELECTED HONORS & AWARDS

- Performance Recognition (Performance-based spot bonus), Calico Life Sciences, 2020 & 2021
- Contributor Award for top submission, *ICML Computational Biology*, 2020
- Selected as an *eLife* Early Career Reviewer, 2020
- Nvidia Most Innovative Use of Deep Learning in Biomedicine, *Nvidia Deep Learning in Biomedicine*, 2018
- National Science Foundation, Graduate Research Fellowship, \$138,000/3 years, 2017
- PhRMA Foundation Informatics Fellowship, \$40,000/2 years, 2017
- UCSF Discovery Fellowship, 2017
- Nvidia GPU Grant, 2017 & 2018
- National Institutes of Health T32 Appointee, \$82,000/2 years, 2015
